

Geography Curriculum Intent

We promote students' **curiosity** of the world, enabling students to develop **deep and holistic knowledge** and **transferable skills**. We want our students to be **responsible global citizens**, who appreciate the concept of **sustainability**, allowing them to understand the importance of the planet and how it can be protected for future generations. We want to **inspire** our students to take a responsible attitude towards the world and have an interest in local, national and global geographical issues.

Curriculum Principles	Curriculum Intent
Curiosity	Our intention is to develop curiosity of the world. We want students to ask and answer questions, solve the world's mysteries and understand the links between aspects of the subject.
Deep and Holistic Knowledge	Through enquiry, we teach student rich and deep subject content, covering a range of physical, human and environmental areas. We allow students to exploit the links between topics by studying 'Global Challenges'.
Transferable Skills	Geography is a subject with strong links to areas of the curriculum such as English, mathematics and sciences. We build students' transferable skills which will benefit them in life.
Responsible Global Citizens	Through studying a range of contemporary global challenges, we allow students to take a responsible attitude towards the world, allowing them to act responsibly and create solutions.
Sustainability	'Meeting the needs of today without compromising the needs of future generations' is a fundamental theme which runs throughout the geography curriculum.
Inspire	Our intention is to inspire future Geographers through an enquiry-led approach to the subject, which inspires them to take a life-long learning approach to Geography and global issues.
